EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

To correct a status identifier, Claim 15 is amended to read as follows:

15. (presently amended) A robust echo canceller comprising:

an adaptive filter for outputting an error signal in response to a detected echo

signal; and

means for supplying adaptive filter coefficients to said filter, wherein said filter

coefficients are given by the formula: $h_{n+1} = h_n + \mu G_n X_n R_{xx}^{-1}(n) [\varphi(|e_n|) \odot \text{sign}(\{e\}_{\frac{n}{M}})]$ wherein h_n

is the estimated echo path; μ is the overall step size parameter; G_n is the step-size matrix; X_n is

the excitation matrix; R_{xx}^{-1} is the correlation matrix; $|e_n|$ is the mean error; \odot denotes elementwise

multiplications; and ~~$\{e_n\}$ is a sample of echo signal~~ e_n is a residual echo vector.

Drawings

2. In the course of prosecution, applicant submitted changes to the drawing sheets for Figs. 1 and 2. In reviewing the application file, examiner notes that a compliant replacement sheet for Fig. 1 is not present. Applicant's response of 1 June 2004 contained duplicate compliant replacement and annotated sheets for Fig. 2, but no sheets for Fig. 1. Applicant should submit

Art Unit: 2644

this compliant replacement sheet with the legend "Replacement Sheet" in the top margin of the paper as viewed in portrait orientation.

3. Figs. 6 through 32 contain spurious figure numbers in the captions. These should be deleted.

4. **The following is an examiner's statement of reasons for allowance:**

5. Claims 4, 6, 8, 10, and 13 through 16 are allowable for reasons stated in the prior Office action, mailed on 27 July 2004.

6. Regarding Claim 3, as shown in the prior Office action mailed on 27 July 2004, the combination of Kanemasa et al. (US Patent 4,621,172) and Duttweiler (US Patent 5,951,626) makes obvious all elements except the reduction of impact of undetected doubletalk by control of the adaptive scaled non-linearity through connection of the doubletalk detector to the modifying means. As such the prior art neither anticipates nor fairly suggests all elements of the claim as amended. Therefore the claim is allowable.

7. Claim 4 is allowable due to dependence from Claim 3.

8. Claims 5, 17 and 19 contain limitations similar to that stated above apropos of Claim 3 and are allowable for the same reasons.

9. Claims 9, 18 and 20 are allowable due to dependence from their respective base claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
